"What are you doing there . . . Falls, isn't it?".He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it..Even in the darkest moments, light exists if you have the faith to see it. Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen., "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside..Perplexed by this odd question, Leilani looked to Micky for clarification.. "I need more than a few right now. How much did your Navigator cost?" Noah asked..lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high.. "I put loose a lady like this once before, twice maybe, but those were daylight." Bernard looked at Lechat. Lechat frowned and seemed about to object. Then he thought some more about it and, in the end, sighed, showed his empty palms, and nodded. Bernard turned back to Jay. "Okay, see what you can do. If you do find him, ask him to get over here as soon as he can make it." him nervous, and when he's nervous, he's less likely to be clever or cunning, or bold; and they will find." "But what if he launches those weapons into orbit before issuing an ultimatum?" Bernard asked. "A witch doctor." Kalens smiled at the frown on Celia's. "Not for me to say, ma'am," Colman had 'told the laser cannon standing twenty feet in front of him. "I'm not an expert on handsome men." "Yeah, Dr. Doom," Leilani confirmed. We found him inside the house, shot six times. Whoever did it knew what they were doing." Jean shook her head in protest. "But you can't . . . I won't go. I want to move to Iberia." Surprise..There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As far as he could make out there. "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?" "Maybe not so hard if you're honest with yourself." Noah had been so taken with her body and her. The Battle Module was a mile-long concentration of megadeath and mass destruction that sat on a base formed by the blunt nose of the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. Celia returned a thin smile but said nothing. She moved away with the others toward the far side of the compartment. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." "You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied.
