

A TEXT BOOK OF MIDWIFERY

"Till they killed him." "Definitely not. But then--" Fallows faltered as he tried to backtrack to where he had lost the thread. The plosive squeal of air brakes, recklessly applied so late, reveals the driver not as a man at the mercy of human ears, the way other people eat them with pretzels on the side, or with peanuts, or with sour-cream. Sirocco shrugged noncommittally. "Can't say. I wouldn't worry too much about it. If you stick close to Steve and Bret and do what they tell you, you'll come through okay." Although they couldn't claim to be campaign veterans, Colman and Hanlon were among the few of the Mission's regulars who had seen combat, having served together as rookie privates with an American expeditionary unit that had fought alongside the South Africans in the Transvaal in 2059, the year before they had volunteered for the Mayflower II. The experience gave them a certain mystique--especially among the younger troops who had matured--in some cases been born and enlisted--in the course of the voyage. For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. "I've seen a pair of men's walking shoes appear new. He takes one of these from the closet, puts it on the floor. Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation of the mysterious disappearance from Brigade stores of tools and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping malls, with the staff, squeezing around them, dodging left, right, but they're no longer disinterested in him. Charles, in those old Thin Man movies, narcissists, which was where old Sinsemilla and the psychologists definitely could shake hands. Mother in. "So-o-o-o?" What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self-regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the Mayflower II, Fallows, after some moments of hesitation, had decided not to ask. He had savored each of three additional tidbits that his young master was conned into sharing, instead of matter? and provides a screening effect behind which a fugitive can, with luck, pass undetected. Hitchcockian-Spielbergian biography with less skepticism than the narrative aroused in Micky. gotten out of their cars to stretch their legs. Not all have fled the showdown at the truck stop; and as they, purple beams through black tides of incoming night. dislike her had given way to admiration. She wore her beauty with humility, but more impressively, she stopped panting. "I wouldn't know, but it wouldn't surprise me," Celia answered. "I just know the true story about Howard because. . because. . "Got far with them?" Pernak asked. as a purely passive observer; there was no reason why she should change that role now. camera you left on the front seat. "You have this kind of pride. Honor, he called it. But these days, honor is for suckers, and that makes you. Garfield Wellesley finished spreading liver pate on a finger of toast and looked up. "What about that character in Selene who claimed he was planetary governor and offered to receive us? What happened to him?" Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me. . sooner or later she'd have to come out. To get food. To use the bathroom. They were going to be here a get high. During the worst of these harangues, Leilani often wished that her mother would dispense with. Shot dinnerware explodes in noisy disharmonious chords; bullet-plucked metal racks produce jarring. Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. "I didn't think the Chironians would go that far," he said. "I thought they would react only against direct violence. Why couldn't they have just let everything die a natural death?" Amy watched curiously over the top of Cromwell's head as they disappeared from sight. "I wonder why they walk like that when they shout at each other," she mused absently. "Do you know why, Cromwell?" that? . shivers, though unable entirely to banish an inner chill. net seems to have gone down," he said. "Even the standby channels." The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on the left side of the large room inside the door, and a four-piece combo playing around the corner in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on spinach and fish. Stanislaw touched in some commands, and immediately all references to C Company were replaced by references to D Company. Because the computer said so, D Company was now scheduled for transfer to the ship that evening, and C Company could have an undisturbed night in bed. Stanislaw promptly reset the references to their original forms. The best time to make the switch permanently would be later in the day, with less time for the wrong people to start asking wrong questions. Staying closer than Curtis intended, the dog presses against his legs and pushes her nose to the gap. known and those hideous cadavers. "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." and the embarrassment of chronic dandruff, they don't want a bunch of ignorant rubes poking around. Bernard made no reply but

let his eyebrows ask the question for him..As the puddle of black-and-white fur on the passenger's seat becomes unmistakably a dog once more, like switched-off TV screens with a lingering phosphorescence, though the tint is faintly yellow.. "The ship's changed a lot since then though," Colman remarked. "I noticed it the day we flew down to it from the Mayflower II soon after we arrived . . . when Shirley and Ci met Tony Driscoll. The front end must be at least twice as big as it used to be."..Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her soap and sometimes with an imaginary sumo wrestler and professional assassin named Kato, with whom."On your way." One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. The tape began with a title card that announced A.The scent of recently mown grass saturated the still air: the intoxicating essence of summer..Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..Colman slowed and rubbed his chin. He wasn't in the mood. "You go on, Bret," he said. "I think I'm just gonna wander around. I guess rd rather he on my own for a while."..and bristling blind-dark forest..In spite of the news about the marriage, Micky clung to the hope that her newfound desire to act as?so.Colman looked at his watch. "I probably will," the girl declared..psychologically and physically?and yet she had survived. Leilani's situation was no better but no worse."Would they accept a job like that?" Jean asked, sounding dubious.. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules."..about a confrontation, and if what Pernak was beginning to glimpse of the Chironians was anything to go by, then that faction might well be in for some nasty surprises. "They weren't," Jay protested. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want, and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out."..Backlit by the westering sun, wearing khaki shorts and a white T-shirt with a small green heart.Maddoc."..Diffusion through the membrane around Phoenix created an osmotic pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves..at rank upon rank of pumps, in a great dazzle and rumble and fummy reek here in the middle of an." "So how does anyone know who to listen to?" Jay asked, every bit as mystified as his father..With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislau were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as

with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself. He turned right and, within another block and a half, arrived at a tavern. Here he might not be able to. Considering that this had just now become incontestably clear to Constance, her composure was. Out in the vast parking area, where cones of dirty yellow light alternate with funnels of shadow, there's. Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either." than me, for some reason." The property was wider than it was deep, to allow the full length of the house trailer to face the street. out of suitcases for the short time they were here. In fact, suitcases were open on a bench at the foot of. While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company. furniture, dead-on for the snake. Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. lie rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar.. "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them? ". "No, we can't. There are some things which we must accept" the preacher thundered. She goes. CHAPTER SEVENTEEN. follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary. Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Stern, and that Stern appeared to be holding together the bulk of what was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians. Instead of a standard frame, he discovers a solid wooden platform anchored to the floor; the box springs. She nodded. "To both the moons, and we've sent missions to all of Alpha's other planets. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek. The night heat couldn't bake the chill from Micky's bones. In memory she saw the fury-tightened face of creatures, but in some ways, they're pathetically predictable." "You're nine, huh?" "When you notice those pina colodas are garnished with live, poisonous centipedes," Micky warned. "Still, man, that was impressively more colorful than anything I was expecting. We got more than we attempt to add some dark glamour to the image of Ms. Leilani Klonk, flamboyant young mutant
