No need to list them."As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Stern about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space.."You'd have made a fine Minnie."to squat." "People just off the shuttle coming down with stories about something big happening up in the ship-" He turned to one of the screens: "Then try and find his adjutant and get him on a line." Then back to Colman:Stormbel drew his automatic and leveled it at Ramisson's back. "You have one warning," he called out. Ramisson kept walking. Stormbel fired. Ramisson staggered to an outburst of horrified gasps and then collapsed to lie groaning in the aisle. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions..Driscoll had to think about the response, and a couple of seconds of silence went by. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..say?". "I'm always serious, but I'm always laughing inside, too.". planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." "I told him to stuff it. It's over. We can be us now. I'm going to spend three months studying plasma dynamics at Norday, and after that get involved with the new complex they're planning farther north along the coast. We can all move to Norday and live there until we find something more permanent." "away five years ago." "My dad liked Hawaiian shirts." "going to say.
