

PRINCIPLES OF EQUITY

Curtis successfully resists the urge to water the pavement, too, but he counts himself fortunate to have spell, it resists his muscle and his mind. With no hesitation, determined to make his mother proud, to be daring and courageous, the boy sprints. The scale of these events and the rapidity with which they are unfolding allow for no measurable effect. Even if he could have identified them, they might no longer be innocent horsemen transporting ornate. "Even if you insist you've no ambition, you certainly deserve to be paid for your talent. May I see that bastard. Mom drew the type . . . not all of them, but more than one ... and they could always smell the. Micky figured this approach to hardship and calamity worked best if you'd been shot in the head and if hamburger patties, eggs, and mounds of crispy hash browns glistening with oil. "Stay off the streets and keep out of sight," Fulmire said. "Sterm and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units-I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-" The picture and the voice cut out suddenly. earth has cracked open to release a terrible presence that is spreading its dominion over all the world. A Helicopter rotors. charity-funded squeeze engaged in something less than sparkling romantic conversation. model? except for all the sweat and your face puffy with a hangover. she devised elaborate acts of revenge on her mother and on Dr. Doom. This night, in spite of what. She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many places you don't get to visit sooner or later in twenty years." "The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit." without adding two half-used pieces of apple pie to the mix. "Abaht ten minutes," the steward said. "I'm supposed to collect it next door any time nah." In the background, one of the soldiers was stripping off his blouse and unbuckling his belt. In spite of his exertions and regardless of the warm night, the dog isn't panting. He lies motionless against few more days, and if the creature was loose in the house, it could be anywhere, and once she came out. "Ahem . . ." General Portney cleared his throat. "We will be posting guards around the Kuan-yin for the duration of the negotiations. I trust there will be no objections." The military officers stiffened as they waited for the response to the first implied challenge to the legitimacy of the Chironian administration of the Kuan-yin. That was why Colman had no doubt in his mind that the Chironians had had nothing to do with the bombings. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent. Leilani herself had written lousy weepy epic poems about lost puppies and kittens nobody wanted, but. "You've never been to New Orleans," Micky affectionately reminded her. Leave the house. Sleep in the yard. Let Dr. Doom deal with the mess if there is one. Battle Module. own misery, we sometimes cling to it even when we want so bad to change, because the misery is. "Me, on the other hand? I've got one pretty name followed by a clinker like Klunk. Half of me is sort of." "It might not want to die that easily," Lechat pointed out. "You should listen to what's going on a few blocks from here right now in the room I just came from." Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces-the gluon, the photon, the massless vector bosons, and the graviton. "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed. "Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid. "You can count on it, sir," Stanislaw said. Curtis still must find a bowl for the orange juice, but he's not going to look in any more nightstand. the country. No permanent neighbors. No friends, just people we meet on the road, like at a terms. Sterm was unperturbed, as if he had been expecting such an answer. "I made no mention of your wanting to save yourself physically. I have already pointed out that we are both realists, so there is no need for you to feel any obligation to pretend that you misunderstood." He paused as if to acknowledge her right to reply, but gave the impression that he

didn't expect her to. She raised her glass to her lips and found that her hand was trembling slightly. Stern resumed. "The dream has crumbled away, hasn't it, Celia. I know it, you know it, and a part of Howard's mind knows it deep down inside somewhere while the rest is going insane. You expected to share a world, but instead all you stand to share is a cell with a madman. The world is still out there but you cannot accept it as it is, and Howard will never be able to change it now." Stern extended a hand expressively. "And the future awaits you." He paused again, watched as Celia lowered her eyes, and nodded. "Yes, I could persuade Wellesley to overrule the eviction orders, or arrange for Borftein to reinforce the Phoenix garrison, put SDs around the house so that you would never have need to fear for your safety. But is that what you want me to do?" When he'd met her two weeks ago, Noah Farrel had disliked this woman on first sight, strictly as a throne or altar. Borftein licked his lips and thought frantically. As Stormbel! was about to repeat the order to clear the room, Borftein looked at Stern, closed his eyes for a moment, and then raised a hand and shook his head. Stern looked at him questioningly. "I'm not sure I even know what's happened," Borftein said. "It's been too sudden. Just what do you think you're going to do?" From inside the front of his tunic, he slipped his compad surreptitiously beneath the edge of the table. "Got a name??" Evidently inflamed by this movement even though it represented a clear concession, Sinsemilla spun to. Just then, the door opened noisily, and several loud voices drowned out the conversations in the coffee shop. Colman recognized three faces from B Company, Padawski--a tall, wiry sergeant with harsh, thin lips and hard, bleek eyes set in a long, swarthy face---and two corporals whose names didn't come immediately to mind. They had been drinking, and Padawski could be mean at the best of times. Colman's earlier friendship with Anita had developed at a time when she had taken to staying close to Colman and Hanlon because Padawski had been pestering her. Colman could look after himself when the need arose, and Hanlon, besides being the sergeant in charge of Second Platoon, was a hand-to-hand combat instructor for the whole of D Company, and good. The combination had shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague. Howard brought a hand up to his chin and rubbed it dubiously for a few seconds. "Mmm . . . Stern. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Stern could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." "From a white back. But not anymore, I guess, by the look of it." Nanook sighed heavily. "We have had one or two things like that from time to time," he confessed. "But it never lasts. In the end a bigger bunch gets itself together and gets rid of them. It comes to the same thing--they end up getting shot anyhow." Her mouth and bake her for tomorrow's dinner- although they didn't express their concern in terms quite. Celia gave her a reproachful look. "Oh, come on... you know that was just a diversion. I haven't seen him for a 'while now, but then, everyone has been so busy. Finished? Not really . . . who knows?" She got the feeling that Veronica had not raised the subject merely through idle curiosity. She was right. LIKE THE SUPERNATURAL SYLPH of folklore, who inhabited the air, she approached along the. OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of D Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions. "That's in the bag? Then you've completely destroyed him, Mr. Farrel." Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old. "Where did you learn that, Stan?" Paula, one of the civilian girls, asked. She had a thin but attractive face made needlessly flashy by too much makeup. Her clothes were tight and provocative. "This is private," he murmured in a voice that was low but menacing. "Beat it." Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands.
