is a concentration of energy--energy density--like at the tip of a match. Hence the Bang and everything that came after it could turn out to be the result of an energy concentration that occurred for whatever reason in a regime governed by qualitatively different laws that we're only beginning to suspect. And that's what my line of research is concerned with." chunky cockroach with crushed-glass sprinkles." Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the main entrance..became the benefactor to bugs, emancipator of mice.."What kind of outcome?" I guess I couldn't have been listening that much."..Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too.."Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted.The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested.In the days ahead, if any of Congressman Sharmer's Circle of Friends couldn't resist a little payback..Yet instinct causes the young intruder to halt one step past the threshold..Adam waved an arm resignedly. Are you all right?".The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags..with a patina of perspiration. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently."..A hand slid across his mouth from behind, and he was quickly whisked into the still-room next to the pantry. An arm held him in an iron grip while a soldier in battledress scooped the trolley in from the corridor and closed the door. There were more of them in there, with a civilian. They looked mean and in no mood for fooling around..seems satisfied. With two fingers, he pulls down both lower eyelids and examines his eyes? God knows."The Kuan-yin will not be able to maneuver instantly," Stormbel

answered. "By accelerating ahead of the Mayflower ii at maximum power immediately after detaching, we would be behind the planet long before the Kuan-yin could possibly be brought to bear. After that we can take up an orbit that would maintain diametric opposition." "Oh, Mrs. D, I disagree. People dressing up in big weird animal suits where you can't see their victims? The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was how the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved." "Oh, so it's trouble them fellas is looking for, is it?" a voice with just a hint of an Irish brogue asked softly from the doorway. Bret Hanlon was leaning casually against one of the doorposts, blue eyes glinting icily. His huge shoulders seeming almost to reach the other side of the door. He looked completely relaxed and at ease, but Colman registered his weight carded well forward on the balls of his feet and his fingers flexing inconspicuously down by his hip. The two corporals glanced at each other apprehensively. Hanlon's appearance altered the odds a bit. Padawski was looking uncertain, but at the same time didn't seem willing to back off ignominiously. For a few seconds that dragged like minutes, the charge in the room crackled at flashpoint. Nobody moved. He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present. stood on the cart. astute. Leilani was clearly unbreakable. back door. She collected her wits quickly, shouldered the roll at an angle across the back of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. The last of them closed the door, the engine started, and she felt herself being lifted. Only then did she start shaking. could travel through the air when it flung itself out of a tight coil. "Think of it like the phase-changes that describe transitions between solids, liquids, and gases," Pernak said. "The gas laws are only valid over a certain limited range. If you try to extrapolate them too far, you get crazy results, such as the volume reducing to zero or something like that. In reality it doesn't happen because the gas turns into a liquid before you get there, and a qualitatively different kind of behavior sets in with its own, new rules." Clump-Clump! "The woman is either nuts or higher than a Navajo shaman with a one-pound-a-day peyote habit." "The Circle of Friends." She's never told us his name. She's got this thing about names. She says they're magical. Knowing way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then, He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings. "Half an hour." She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection. the key to escape, to freedom, and to being Curtis Hammond. About time too, Bernard thought to himself. hallway, hadn't been the farmer and wife, awakened and suspicious. These are the same hunters who. "I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh. "Somebody has to run the Army. It's just his turn. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as Opposed to pride. Weakness or strength.
