Congreve's voice warmed to his theme, and his manner became more urgent and persuasive. "Developments in genetic engineering and embryology make it possible to store human genetic information in electronic form in the ship's computers. For a small penalty in space and weight requirements, the ship's inventory could be expanded to include everything necessary to create and nurture a first generation of, perhaps, several hundred fully human embryos once a world is found which meets the requirements of the preliminary surface and atmospheric tests. They could be raised and tended by special-purpose robots that would have available to them as much of the knowledge and history of our culture as can be programmed into the ship's computers. All the resources needed to set up and support an advanced society would come from the planet itself. Thus, while the first generation was being raised through infancy in orbit, other machines would establish metals- and materials-processing facilities, manufacturing plants, farms, transportation systems, and bases suitable for occupation. Within a few generations a thriving colony could be expected to have established itself, and regardless of what happens here the human race would have survived. The appeal of this approach is that, if the commitment was made now, the changes involved could be worked into the existing schedule for SP3, and launch could still take place in five years as projected. 'Columbine bit her lip, furrowed her brow, and evidenced, in general, a sudden change of heart. "God, Larry? you're right! I've been kidding myself: the pageant isn't my problem? it's my excuse. My problem?" her voice dropped, her eyes avoided his?" is timeless and well-known. I fell in love with the wrong man for me. And now it's too late. Would you like to hear a long story, Larry? The "Be quiet and help me," said the thin grey man, "or I shall put you in the trunk with my nearest and. Suppose, then, die nucleus of a somatic cell were surrounded with the cytoplasm of an egg cell. Would the genetic equipment in the nucleus unblock, and would the egg cell then proceed to divide and redivide? Would it go on to form an individual with the genetic equipment of the original somatic cell and, therefore, of the person from whom the somatic cell was taken? If so, the new organism would be a clone of the person who donated the somatic cell.. "Depends who you are. For D Company all things are relative." under the unimaginative control of the computer. I could take a brief look to make sure everything was all right, then come back for her at noon as agreed. I was enjoying the frosty bite of the air in my nose and throat and the surreal effect of the steam rising off the dawn-pink Heliomere when I saw Amanda running up the beach toward me, her hair flying long and loose around her.. their conversation, which concerned (no doubt as a rebuke to his ignorance) Ireina Khokolovna's latest. There were helpless groans at this, but no protests. McKillian and Ralston headed for the pile of salvaged equipment, hoping to rescue enough to get started on their analyses.
