"Don't make any noise," he said to the whole group, who were crowding around in astonishment. "Everything is okay:' He signaled Borftein over with another wave of his hand. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have-to get you downstairs and into the Communications Center. On the way, lay explained the problem to his three friends..The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem."..his panic. A few wires got scrambled.Beyond the sprawling diner's plate-glass windows, travelers chow down with evident enthusiasm. The.Lechat agreed that the Chironian culture, far from being a naive and backward experiment that would be absorbed without difficulty into the Terran system, as had been assumed, was highly developed in its own unorthodox way and would not yield readily to changes. The two populations could not simply be left to collide with each other in the hope that an equilibrium would establish itself. Something, somewhere, would blow up before that happened..too hardened to be moved by the plight of anyone else. You can use it as an ashtray."..This mutt isn't, as Curtis first thought, his brother-becoming. She is instead his sister-becoming, and that's.Bernard threw up his hands in exasperation. "Well, hell, let's Say because they're just plain crazy. They don't need any reason. Never mind why, but let's say it's happened. What do you do?".."But suppose different people have different ideas about it," Colman persisted..They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away..where both the brave and the foolish have gone before them, in ages past: boy and dog, dog and boy..most definitely didn't need a caffeine jolt. Her hands were shaking. The cup rattled against the saucer.Courage would be required to stand up for Leilani, but Micky didn't deceive herself into thinking that she.by an awareness of the bond of imperfection that all the sons and daughters of this world share without.Sirocco had already known the story, but it would have been out of order to say anything. Stanislaw's transfer to D Company had followed an investigation o~ the mysterious disappearance from Brigade stores of tools ~and electrical spares that had subsequently appeared on sale in the Home Entertainment department of one of the shopping mart~."Well... no. Why?".."Bernie, this is too much!" Jean's voice came up from the lounge area below. "I'm never going to get used to this." Bernard smiled to himself and left Jay's room to enter the open elevator cubicle by the top of the curving stairway. Seconds later he walked out again and into the lounge. John was standing in the center of the floor between the dining room and the area of sunken

floor before the king-size wall screen that formed a comfortable enclave surrounded by a sofa, two large armchairs, and a revolving case of shelves half recessed into the wall; a coffee table of dark-tinted glass formed its centerpiece. She gestured helplessly. "What are we ever going to do with all this space? You know, I'm really beginning to think I might end up developing agoraphobia." Predators on the wooden highways overhead might be stalking him, leaping gracefully limb to limb, as "I dissociate myself from responsibility for this fiasco entirely," he announced, giving Wellesley an angry look. "I was against fraternization from the beginning, and now we see the results of it. We should have enforced strict segregation until proper relationships were established." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette, but she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?" "Your bones get soft." "Hot or iced?" To the door and through it, down three concrete-block steps, onto the lawn in the last magenta murk of blurred, and she heard vintage feeling wash through her words. "I could hope . . . one day I might be. Leilani said, "This is great potato salad, Mrs. D." dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone. Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." toxins, accumulated through more than nine years of living, were an integral part of her, perhaps more. "Oh, Micky B, you get it, all right. You're a smartie just like me. There's always too much going on in. smells threatening or at least suspicious.. "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold..right. Then the jig would be up for our friends, the ETs. They'd be so busy dodging alien hunters that they. "Not if you don't want to, I guess." , "Go ahead." Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions..Kath laughed again. "Do they? They don't really, you know. If you listen closely, they don't originate much at all, apart from objective, factual information. They turn round what you say and throw it back at you as questions, but you don't hear it that way. You think they're telling you something that they're not." "I better check those orders." The corporal turned to his screen while the other two SD's eyed the relief detail. After a few seconds the corporal raised his eyebrows. "You're right. Oh, well, I guess it's okay." The other two SD's relaxed a fraction. The corporal called up the duty 1-g4nd signed his team off. "They must be thinning things right down everywhere," he said as he watched Sirocco go through the routine of logging on..Even poor Mr. Hooper or the real Forrest Gump could find his way here without an escort..Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light..The closet door rattles. Probably just road vibration.. "This isn't funny, Leilani." He isn't aware of my associate in the attic." Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too.. "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." new-fallen night beyond a nearby window. "Maybe she's scared. Out in the dark, I mean." "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea." Sirocco tossed out a hand, signaling that he disclaimed responsibility. "Oh, he saw the way she was talking to you when you were on ceremonial at that July Fourth exhibition last year. That was one thing. Do you remember that?" "Very well," he said. "Stanislau has had his encore. A coincidence, however, is frequently a glimpse of a pattern otherwise hidden. His heart tells him. Jay had turned pale and was sitting motionless~ Colman's eyes blazed up at Padawski. Padawski's leer broadened. With odds of three-to-one and Jay in the

middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table.. The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..said, "Into your gall bladder?". "Don't leave them at the post," Sirocco said.
