"But I'd have to become part of ... what Selene is." She pulled away from me, shaking her head. "That's unthinkable. I couldn't bear it. There's no other way but to go on as I am. So promise me, Matthew, promise that if you ever see Selene, you'll tell me. I have to know when she's stealing time." I also found damp towels that weren't there last night. If she isn't honoring our agreement any longer, soon it won't be minutes she's taking, it will be hours, then days, until there's no time left I can count on for my own. I don't know what to do, Matthew. How can I fight her?" "Look and see," said Lea. She sat down close to him and whispered into his ear, "If anyone, such as Freddy, for instance, does not have the little one." In fact, the controls on this machine are unfamiliar, die little viewers you have used all your life have only one knob, for nearer or farther? to move up/down, or left/right, you just point the viewer where you want to see. This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are

floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. You press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..imprisoned and tortured. By that time over forty other Ozos were in the hands of dissidents.. "That's fine, but there is an even more important order of business. We have to go out to the dome." "Good." The years Fallows remembered had come later, when the slender fingers of gleaming new cities were beginning to claw skyward once more from the deserts of rubble, and new steel and aluminum plants were humming and pounding while on the other side of the world China and India Japan wrestled for control over the industrial and commercial might of the 'East. Those had been stirring years, vibrant years, inspiring years. Fallows remembered the floodlit parades .in Washington on the Fourth of July-the color and the splendor of the massed bands, the columns of marching soldiers with uniforms glittering and flags flying, the anthems and hymns rising on the voices of tens of thousands packed into Capitol Square, where the famous building had once stood. He remembered strutting into a high-school ball in his just acquired uniform of the American New Order Youth Corps and pretending haughtily not to notice the admiring looks following him wherever he went.
