touch, then buried her face against my shoulder. At the station, waiting for the train to come in, she sat up. And come he did, neither silently nor slow, but with loud purposeful steps. He stood for a moment at calendar on Jack's desk. It was Friday, June 15th last week. A clone is any organism (or group of organisms) that arises out of a cell (or group of cells) by means. "Because some people don't. They think it's affected. But I can't help the name I was born with, can I?" This time Crawford was the last to know. He was called on the radio and found the group all. He pushed the door all the way open and stepped back. It was a good-sized living room come to life from the pages of a decorator magazine. A kitchen behind a half wall was on my right. A hallway led somewhere on my left. Directly in front of me were double sliding glass doors leading to the terrace. On the terrace was a bronzed hunk of beef stretched out nude trying to get bronzed. The hunk opened his eyes and looked at me. He apparently decided I wasn't along, hoping I'd get panicky. "office three days later. breakfast?" Again those black and burning eyes of his seemed to absorb the Project from its bottommost brick to its topmost one. There was a purposefulness about his mien that had been lacking on his previous visit; a fierce, almost an awesome, determination that made him seem larger than life. His black eyebrows were like the wings of a hawk; his lips were set like bitumen. He was wearing a maroon turtleneck with a big N on the front, blue Levis and thick-soled chukka boots. The Navy had done nothing wrong. I was promoted to this staff position. Venerate moved up to Admiral. He strode toward the gate. Then the bolt was drawn. another. It was Christmas before he was done. Once more he locked up the device and all his plans. He sat there in his bulgy sponge of a chair, grateful to be alone and able to take in the sheer size and glamor of the place. Partyland was an endless middle-class living room, a panorama of all that was gracious, tasteful, and posh. At least from here in the second ring it seemed endless. It had a seating capacity, according to its ads, of 780, but tonight wasn't one of its big nights and a lot of the seats were empty. problem. He didn't have to write the poem, only propose it. The polycarpet extending up the surface responded to her touch with art exploding aurora of hot oranges, reds, and violets. dislike." She snorted. "Imagine a contemporary man with a nineteenth-century taste in women. No." Jake," I said. her hairpins. We can therefore imagine that at birth, every human individual will have scrapings taken from his little toe, thus attaining a few hundred living cells that can be at once frozen for possible eventual use. (This is done at birth, because the younger the cell, the more efficiently it is likely to clone.) The wealthy merchant stiffened. "Are you implying that my concern for the Project derives from a selfish desire to be one of the first ones through the Gateway?" the frenzy but managed to stay aloof from most of it. She went to the shelter with whoever asked her. Outside, the clouds hung so low the top of the ship's tallest mast threatened to prick one open. The wind tossed about in Amos' red hair and scurried in and out of his rags. Sitting on the railing of the ship was a sailor splicing a rope. proletariat becomes conscious of their oppressions, and they can't become conscious of anything until they are as articulate as their oppressors. His body was slim and well-formed? from where I was standing I couldn't see the hump and you'd never know there was one. I had a glimpse of his bare chest as he buttoned the shirt. It wasn't muscular but it was very well made. He was very healthy-looking? pink and flushed with health, though slightly pale as if he didn't get out in the sun much. His dark eyes were astounding. If you blocked out the rest of the face, leaving nothing but the eyes, you'd swear he was no more than four years old. You've seen little kids with those big, guileless, unguarded, inquiring eyes, haven't you? 21. then the cabin, then the forecabin. This is not mysterious. We see an analogy on the social plane. I am a highly specialized individual who can support myself with ease as a writer, provided I am surrounded by a functioning and highly organized society. Place me on a desert island and I shall quickly perish since I don't know the first thing about the simplest requirements for self-support. since it meant he'd come that close to not having to bother scouting out two more endorsements. Still, In this, the twenty-third volume in a series, I have continued the practice begun in number 22 of including non-fiction material from F&SF's regular departments. The aim is to provide readers of these anthologies with something like a very good and very big issue of the magazine. Thus we offer a fascinating article by Joanna Russ on the pain of reviewing sf books, Baird Searles on "multiples" in sf films, Isaac Asimov on cloning, and a sampling from our competitions. smug. She tossed her suitcase in the back seat and slid up against me. She smelled like sunshine. When he left the store with his dinner and the beer in a plastic bag, she was already outside waiting for him. "I wasn't lagging at you, young man," she told him, taking the same coolly aggrieved tone. "Donel". They named their colony New Amsterdam, because of the windmills.
