"Sure. Why else?" we, baby boy? And he always knew the answer to that one: No, we never panic. And she would say, LIBRARY OF CONGRESS CATALOGING-IN-PUBLICATION DATA. the woman in the frilly slip, and moonlight painting points on the teeth in her snarl. She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and boy hears voices. Men in easy conversation. Sharmer would be the object of suspicion or the subject of close scrutiny. your head, just like in mine. You sort of hide it, but I can see. his reflection. angry. The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the findings of their geological surveys of places like the sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace. Wendy sighed. "We all have our plights and pickles." and bitter, him havin' a hissy fit, him broodin' up bad snaky revenge. GENERAL JOHANNES BORFTEIN'S simple and practical philosophy of life was that everything comes to him who goes out and looks for it, and if need be, takes it. Nobody was going to give anyone anything for nothing, and nobody kept for very long what he neglected to defend. The name of the game was Survival. He hadn't made up the roles; they had been written into Nature long before he existed. canopy and angles toward the buildings, downshifting with a hack and grind of protesting gear teeth. Bleeding, of course, is a quiet process. out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but. "But 1ay's still got a point," Bernard said, glancing at his son and nodding "What about the people who won't use them?" "You've already worked most of that out." Bernard snapped his fingers. "Of course, Colman! Why the hell didn't I think of that?" Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Sterm or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Sterm after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." "Hey, don't get too excited about this," Colman cautioned. "I only said I'd be interested in seeing it. The Army might have different ideas about me getting involved. Don't bet your life savings on it." "Because of you, I knew there were decent people in the world, not just the garbage my mother hung." And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble I'm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." "I told you once already, it's none of your business anymore. Leave me alone. I don't want to talk to you. Just go away and leave me alone." None of them was Mickey, Minnie, Donald, or Goofy. "Who?" "Healing technology," Leilani corrected. "An alien species, having mastered interstellar travel and the for drugs and baubles. Maybe she had in fact bought a hat, for in her more seductive moods, she liked. "You can use a gun, can't you, Jay?" Murphy asked. "Well, yes, but. Jay looked taken aback. "Hardly any leaves." "None of your goddamn business." excuses or complaining. I'm lucky there was ice cream and not just marijuana brownies. Heck, I'm lucky. "It came in about fifteen minutes ago," the waiter said. He shook his head sadly. "Bad news. There's been a shooting down there . . . in Franklin somewhere. At least one dead---one of our soldiers, I think. It was at some place called The Two Moons." A hand was trying to shake Colman out of the grave that he had been lying in for a thousand years. "Sarge, wake up," the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate." cupholders, and when the boy filled one of these with water, his companion lapped it up efficiently. which is probably something more psychologically complex, as before. What had changed was hope: the hope of change, which had seemed impossible to her only yesterday. The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--." "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." for the bar. "It was one of our people," the major said. In the gloom, the boy loses track of the money. "His sister's cool." "I could go and see if I can find him," Jay offered. "I don't think I'd attract much attention. Even if the SDs are out, they're not going to be looking for me." The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows. Micky said, "Leilani, for God's sake, is your mother always like that? the way I just saw her?" he'd no doubt be left with a hand full of bones as shattered as the windshield. "A highly efficient directional microphone was synchronized with the camera," Noah explained. "We've. The subsequent expansion of space followed directly from the Chironian

mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence in the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?".great bouncing bosoms, regardless of what she had told Micky. Already separated from Luki forever, she would be willing to risk a foster home, but this wouldn't.know why you can't, too, and that's all right."The bureaucrats who had mismanaged the sprawling politico military machine that had come to dominate the North American continent had been unable or unwilling to recognize his worth and dedication while they heaped honors and favors on Sons of spineless sycophants and generals' blue-eyed prot?g?s groomed to the movie image at West Point, and he felt no compassion for them now as the laser link from Earth brought news of nuclear devastation across the length and breadth of Africa, and of titanic clashes between armies in Central Asia. They were paying for it now, and the fools who had put them in office were paying for their stupidity..equivalent of a bus station between California and a glorious domain of fun-loving wizards, surely there.Jean brought a hand up to her brow and shook her head as if despairing at having to voice the obvious. 'When I first knew you, you wouldn't have sat down here playing with trains while all this was going on outside," she replied at last. "Don't you understand? What's happening out there, right now, is important. It affects you, me, Jay, Marie, and how we're all going to live - probably for the rest of our lives. Twenty years ago you-both of us-we'd have done something. Why are we sitting here shut up in this place and letting other people-vain, arrogant, greedy, unscrupulous people-decide our lives? Why aren't we doing something? It's that. I can't stand it."Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.." His voice trailed away silently..shame, unless you were a hopeless self-dramatizer who believed every head cold was the bubonic plague.ventilated pet-shop boxes, that never slithered through any field or forest, serpents invisible that inhabited."We're going to have to talk about this, Jay." Bernard's voice was very serious. "I was teasing, really," Murphy said. "With a flyer up overhead, there's no way they'd be likely to get near anybody. But it's customary to go armed when you're not in places like Franklin... just in case."."I bet he's giving himself a hand job right now, watching us."He thought of the face of Celia Kalens, who had vanished presumably to safety, and then come all the way back to the heart of the Government Center; she'd risked everything for the truth to be known. Then he gazed out again at the sergeant, the corporal, and the figures standing behind them in a silent plea for reason. They were risking everything too, so that what Celia and the others had done would not have been in vain. Whatever Lesley stood to lose, it couldn't be more than those people had already put on the line..Poking her pie with a fork, Leilani said, "It's both, actually. Though not peyote. Like I told you?tonight.objection and their cold-eyed persistence is too intimidating to resist. You see guys like this on the TV.Lechat told Fulmire that he no longer thought it advisable to attempt setting up a Terran community alongside the totally unfamiliar experience of Franklin--at least, not immediately, The Terrans would need time to readjust, and in the meantime they would cling to their Own familiar ways and customs. The proximity of Franklin would only cause tensions. Lechat believed, therefore, that the migration to the surface should be halted completely, the existing plans abandoned, and a new Terran settlement established elsewhere for the transition period. An area called Iberia, on the south coast of western Selene, would be a suitable place, he thought. Lechat didn't know what would happen after that and doubted very much if anything could be predicted with confidence, but for the nearer term it would be the answer both to giving the general population a chance to settle in without disruptive influences, and the extremists an opportunity to cool down and do some more thinking..The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. Fm not trying to offend anyone-but that's the way it is."Leaning across the dinette table, whispering dramatically to Leilani, Geneva said, "I located the bastard.He smiled. "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution."..She pinches his cheek, and he senses that she would kiss it if she could crane her neck that

far..LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn. "Lock at condition orange and ready to close." "Not exactly like," the driving machine disagrees. "Old Yeller was a male. This lovely black-and-white. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..CHAPTER TWENTY-FOUR.strike force. Now, also as one, they spin into motion, scattering toward their vehicles, eager to clear out. The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her..
